Internship Profile

Job Title:	HPC Internship
Job Description:	Parallel Computing Internship Opportunity

KLA Corporation, KLAC (NASDAQ) - a leading provider of process control and yield management solutions, partners with customers around the world to develop state-of-the-art inspection and metrology technologies. These technologies serve the semiconductor, data storage, LED, and other related nano electronics industries. With a portfolio of industry-standard products and a team of world-class engineers and scientists, the company has created superior solutions for its customers for over 40 years. Headquartered in Milpitas, California, KLA has dedicated customer operations and service centres around the world. Additional information may be found at www.kla-tencor.com

Who are we? We research, develop, and manufacture the world's most advanced inspection and measurement equipment for the Semiconductor and Nano electronics Industries. We enable the digital age by pushing the boundaries of technology, creating tools capable of finding defects smaller than a wavelength of visible light. We create smarter processes so that technology leaders can manufacture high-performance chips—the kind in that phone in your pocket, the tablet on your desk and nearly every electronic device you own—faster and better. We're passionate about creating solutions that drive progress and help people do what wouldn't be possible without us. The future is calling. Will you answer?

Intern Roles and Responsibilities

To explore state-of-the-art technologies in high

performance computing to advance the AI + HPC + Cloud solutions that are leveraged in KLA's products. The scope of the technologies includes new HW architectures (such as GPUs, AI accelerators, and FPGAs), compiler stacks, and SW with a focus on image processing, and AI technologies including Machine Learning and Deep Learning.

- Your responsibilities will include:
- Design and analysis of algorithms
- Research the solution space
- Develop concepts
- Prototype and validate concepts
- Specify software requirements
- Software/algorithm development (productization/programming)
- Preferred Qualifications
- Knowledge and understanding of computer architecture are highly desirable
- Solid background in design and analysis of algorithms is desirable
- Good demonstrated programming skills in modern C++ is desirable
- Experience with heterogenous parallel computing (including GPU) is a plus
- Analytical skills, problem-solving skills (quantitative & algorithmic)
- Ability to work in a team, and contribute to the team effort
- Experience with image processing / signal processing / machine learning is a plus
- Proficiency in Python, DL frameworks, distributed computing, Linux operating system internals, compiler level optimizations will be a big plus

Minimum Qualifications

- Bachelor's or Master's level degree in Computer Science, AI, EE
