Other nature(s) of business: Other (High Frequency Trading)

Internship Profile

Job Title: Quantitative Researcher Intern

Job Description: AlphaGrep Securities seeks a Quantitative Researcher, who will be part of trading group which executes algorithmic strategies based on market behavior. We cover the global markets by leveraging and integrating technology, risk management and quantitative research. Being a proprietary trading business, we trade our own accounts and have no investors, clients or customers.

- ☐ Designing, implementing, and deploying high-frequency trading algorithms
- ☐ Exploring trading ideas by analyzing market data and market microstructure for patterns
- ☐ Creating tools to analyze data for patterns
- ☐ Contributing to libraries of analytical computations to support market data analysis and trading
- ☐ Developing, augmenting, and calibrating exchange simulators

QUALIFICATIONS:

AlphaGrep encourages bachelor's, and master's students in computer science, mathematics and related fields to apply. Additional requirements include:

- ☐ Familiarity with machine learning (a plus)
- ☐ Experience with data analysis, market research and data modeling (a plus)
- ☐ Brilliant problem-solving abilities
- ☐ Software development experience as demonstrated through course work, research projects, or open source activities, preferably in C++, Python or R/Matlab
- ☐ A passion for new technologies and ideas
- ☐ The ability to manage multiple tasks in a fast-paced environment
- ☐ Strong communication skills

- Strong communication skills
- A working knowledge of Linux/Unix
